CAREER ACHIEVEMENTS

- **Developed tools to improve operating efficiency at Deutsche Bank:** Designed and developed VBA tools using Agile principles to determine and implement fixed pay target ranges, assign team emails, and mass deliver email communications.
- **Managed a workstream as part of large-scale HR transformation programme at Admin Re:** Managed data migration through ETL processes and redeveloped strategic reporting landscape. SME in the transfer of recruitment, lifecycle, payroll, performance, reward, and HRBP processes to outsourced services provider.
- **Improved reporting efficiency and key messages/insights reporting for Admin Re:** Improved accuracy and reporting efficiency by transforming processes that took over 6 days to around 1 day. This was achieved through performance mentoring and management of the development of corporate MI reporting and HR dashboards.
- **Managed the development of TAPI salary and bonus modelling plan for Admin Re:** Managed the creation of automated Target Annual Performance Incentive (TAPI) modelling tool to plan circa \$25m global budget for salary and bonus awards.
- **Managed performance review, bonus budget and remuneration review cycle for Admin Re:** Managed the creation of systematic process for collecting, moderating, and management reporting of performance and talent ratings; leading to allocation of discretionary bonuses and annual pay reviews.

CAREER HISTORY

HR BI Specialist [Ltd Co Contractor] - Deutsche Bank, Birmingham **Nov 2016 – May 2019**

- Designed and developed a salary ranges VBA tool to enable employee target ranges to be evaluated.
- Developed Excel / Access VBA solutions automating assignment of team emails and sending of email broadcasts.
- Progressed executive management dashboards for senior executive compensation committee spend reporting.

BI Developer & Data Migration Specialist [Ltd Co Contractor] - Admin Re UK, Telford, Shrops **May 2016 – Nov 2016**

- Managed comprehensive end-to-end data migration programme from existing HR administration and payroll providers onto single consolidated platform managing downstream system stakeholders and external consultants.
- Developed advanced VBA recruitment and data management solutions to effect robust data integrity, positive manager experiences, and streamlined operational efficiency.

HR MIS Specialist [Ltd Co Contractor] - Deutsche Bank, Birmingham **Nov 2015 – May 2016**

- Co-ordinated centralised data for almost 90,000 employees to implement a global Total Compensation Framework. This included the allocation of mandatory, discretionary, promotion, and PayMix shift budgetary spend.
- Managed compensation planning and employee maintenance serving as data custodian, process owner, and stakeholder manager to divisional and regional reward advisors to enable management of employee populations.
- Created system to co-ordinate over 10,000 corrections making system updates and ensuring data integrity and audit requirements were adhered to.

- Created data feeds to downstream business systems supporting general ledgers, business modelling, and systems and facilities access.
- Developed inputs to a data warehousing solution enabling HR and finance to align datasets for commercial analysis. Engagement of Strategic Change to introduce 'FTE Resource Tracker' as model owner, SME, and escalation point.
- Designed a multi-currency Target Annual Performance Incentive (TAPI) forecasting tool to support performance reviews (circa \$25m budget), leading through to API bonus awards and annual remuneration reviews.
- Created a census "flight tracker" for business transformation, employee exit planning, and redundancy calculations.

- Development and provision of MI reports as outsourced services provider for The Phoenix Group, Southern Water, and Sun Life Financial of Canada within a commercial operating environment governed by contractual SLA/KPI framework.

Consulted independently and delivered several freelance projects including designing a database schema for a Cultural Audit and Map for Dublin City Council.

Roles prior to April 2006 include Stock Controller and Production Team Leader.

SKILLS PROFILE

Data Science:	Jupyter, Anaconda: Pandas, NumPy, Matplotlib, Seaborn
Business Intelligence:	SAP BusinessObjects Web Intelligence, MS Excel, MS Access, data visualisation
Project Management:	Agile project / product development, stakeholder engagement
Online Tools / Media:	WordPress, SEO, AdWords, online media, Google Analytics, internet power user

PROFESSIONAL DEVELOPMENT

Enjoys a continuous programme of self-study for professional and personal development principally targeted towards skills in software engineering, web development, data science, and business intelligence.

In addition to numerous video courses, I have studied many highly regarded books by industry leading experts in web development including Lightweight Django, REST APIs with Django, Think Python, and The Road to Learn React. I look forward to attending PyCon UK in September 2019.

EDUCATION

- GNVQ Advanced Business Studies
- 5 GCSEs at grades B – C
